

ARCHITECTURAL IZZILITE LINE

Art Line Bulbs

Architectural Interior Dimmable Warranty

OVERVIEW

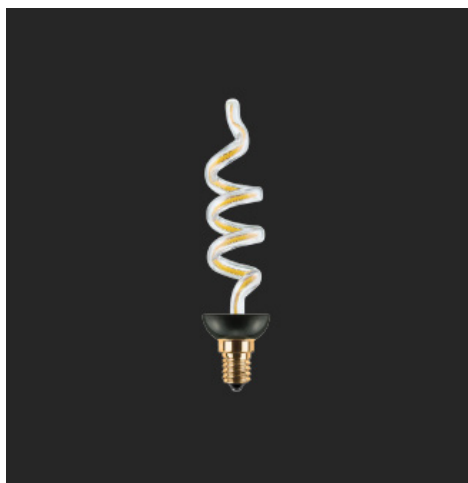

Classic lamp shapes and completely new styles – interpreted in an expressive and artful way! With up to 500 lumens and with their omnidirectional light-distribution the “light sculptures” of the “art” line are suitable for general illumination as well as for extraordinary accentuation.

Light quality and dimming capacity meet the highest demands – thanks to our unique circuit concept and the latest flexible Filament „Plus“ technology. A patented production method and high-quality specialty plastics guarantee excellent thermal management and thus a long lifetime. The lamps are break-proof, resistant to vibration and therefore suitable for a wide range of applications
